Heated Gloves

Our 2011 range of heated gloves are our best to date using the very latest heating elements providing the most impressive heating available anywhere. All of our heated gloves provide five digit heating and are supplied with a pair of battery boxes that take AA batteries. All gloves can be upgraded to our brilliant Lithium-Polymer units to provide longer heating times.

All gloves are made from water resistant fabrics and contain a waterproof and breathable inner membrane to protect the heating elements. Gloves are fitted with battery pocket with a small clear window so that the battery operation is visible for ease of use.

Our Sports gloves now contain removable inners so that these can be taken out and washed separately from the gloves which is ideal for active sports people as hands can get very warm.

8a. Infra Leisure Glove £42.95

The blazewear Infra glove is the latest design of our all purpose leisure glove to keep hands really warm in winter.

Incorporating our latest 5 digit heating system now powered from reduced size battery boxes with extended wrist for comfort. Larger battery pocket with clear window for ease of use.

Made from lightweight, water resistant nylon and fitted with waterproof and breathable Ultra III tec membrane. This glove is now also supplied in size XS.

The blaze Rug

Benefits of the Rug

Quick and easy to warm large muscle areas prior to exercise to enhance performance and reduce injury risk

Increases blood circulation

Prevents excessive cool down after endurance riding

A brilliant aid for relief of stiffness and as a treatment for injuries

Warms horses when damp and shivering after being outside in winter

Gentle warmth for long periods underneath night rugs

Less bulk for the horse, than from heavier more thicker rugs

Features of the Rug

Controllable heat from a small lightweight battery to warm the main muscle areas of the horse before exercise

Far-infrared function to aid blood circulation and get the horse ready for action

Five heat setting control allows adjustment of temperature

Waterproof and breathable exterior, designed to be used as an outer or inner stable rug

The Blaze Rug uses the latest in polyester based heating technology using a total of 12 heating strips

Heating strips emit far-infrared radiation, giving proven benefits in aiding blood circulation

Rug interior is 100% polyester to ensure maximum heat transfer from elements to the horse's body

For ease of use, the rug is fitted with a small external pocket at the shoulder to hold the combined battery and controller
